PROFILE

Motivated first-year Computer Science student at Sunway University Malaysia with a strong foundation in Object-Oriented Programming (Java) and Python. Hands-on experience building lightweight desktop software and API-driven projects. Eager to leverage technical problem-solving skills, Git version control, and active coding club involvement in a software engineering or tech internship role.

WORK EXPERIENCE

○

Computer Science Club | Member & Event Volunteer

Apr 2026 - Present

- Co-organized a university-wide 24-hour hackathon, assisting 100+ participants with registration and logistics.
- Participated in weekly coding workshops covering algorithmic problem solving and open-source contributions.

○

Math & Science Peer Tutor | Freelance

Mar 2025 - Dec 2025

- Tutored 5 high school students in SPM/A-Level Additional Mathematics, improving average test scores by 15%.
- Communicated complex technical concepts using simple visual analogies and structured step-by-step problem breakdowns.

EDUCATION AND TRAINING

○

Computer Science Degree

Apr 2026- Present

Sunway University

Expected Graduation: Nov 2028

Core Coursework: Web Fundamentals, Computer Organisation, Discrete Mathematics.

○

Google Gemini for Academic Excellence Certification

Jul 2026

Sunway University

Mastered advanced prompt engineering (PARTS framework), AI-assisted research workflows, and responsible AI evaluation for academic analysis.

○

24-Hour University Hackathon

Jun 2026

Sunway CS Society

Attended technical workshops on RESTful APIs and rapid prototyping in Python.
