

Jacky Yeap Chun Wai

Front-end & JavaScript Developer

Email: 26033530@imail.sunway.edu.my Contact: +60 18-900 9010

Location: Bandar Sunway, Selangor, Malaysia

SPECIALIST SKILLS

- HTML5 & CSS3
- JavaScript
- DOM Manipulation
- Responsive Web Design
- Website Testing

KEY TECHNOLOGIES

- HTML5 & CSS3
- JavaScript
- GitHub
- VS Code

EDUCATION

Keat Hwa High School
2020 – 2025

Bachelor of Computer Science
Sunway University
Apr 2026 – Expected
Graduation: 2028

LANGUAGES

- Chinese
- English
- Malay

INTERESTS

- Web Development
- Front-end Development
- Software Engineering
- Problem Solving

Professional Summary

I am currently pursuing a Bachelor of Computer Science at Sunway University. Through the Global Explorers website project, I strengthened my front-end development skills by working on JavaScript implementation, interface improvements, bug fixing, and website testing. The project enhanced my understanding of collaborative web development and writing maintainable code while improving my technical and problem-solving abilities.

Project Highlights

Front-end Development & JavaScript Implementation 2026

Global Explorers Website Project

Developed front-end features across multiple pages, reorganised JavaScript into dedicated modules, refined the homepage interface and improved maintainability through cleaner project structure.

Website Testing & Bug Resolution 2026

Web Fundamentals Project

Performed functional testing, verified user workflows, identified interface issues and resolved bugs before final integration to improve overall website stability and user experience.

Homepage Enhancement & UI Improvement 2026

Global Explorers Website Project

Improved homepage layout consistency, refined visual presentation and adjusted interface components to provide a cleaner, more user-friendly browsing experience.

Booking Workflow Optimisation 2026

Global Explorers Website Project

Enhanced booking validation, streamlined JavaScript workflow and corrected functional issues to deliver a smoother and more reliable booking process.

Project Development

JavaScript Code Organisation 2026

Web Fundamentals Coursework

Applied JavaScript modularisation by separating page-specific functionality into dedicated files, improving code readability, maintainability, and future scalability throughout the project.

Website Testing & User Experience Improvement 2026

Web Fundamentals Final Project

Participated in interface refinement, usability testing, and project verification to ensure consistent functionality, smoother navigation, and a reliable user experience before the final project submission.
